

TAPE EDITING PUNCH

MODEL 302—MODEL 302AF FOR ADVANCE FEED TAPE

The C A C Model 302 Tape Editing Punch.

For any level tape and edge punched cards.

Model 302 AF for Advance feed tape.

Hardened steel, precision ground die set with comfortable hand held stylus results in a clean character hole.

Sprocket hole size guide pins accurately position tape under punch character line.

Hardened and ground steel knife allows for cutting tape precisely between characters.

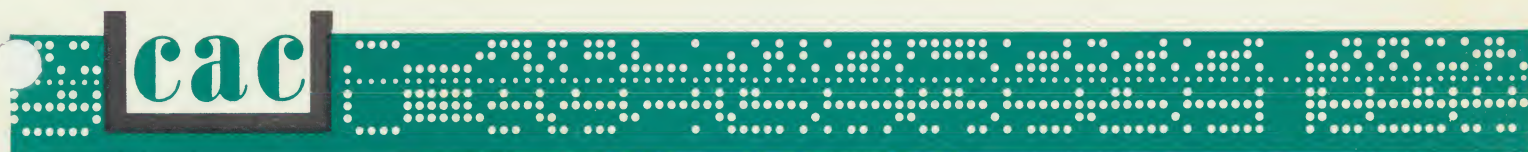

A single line or a block of characters may be prepared for insertion anywhere in the tape.

A ribbed rubber base protects desk or console and prevents instrument from sliding when used on a smooth surface.

This is a very fine precision made instrument.

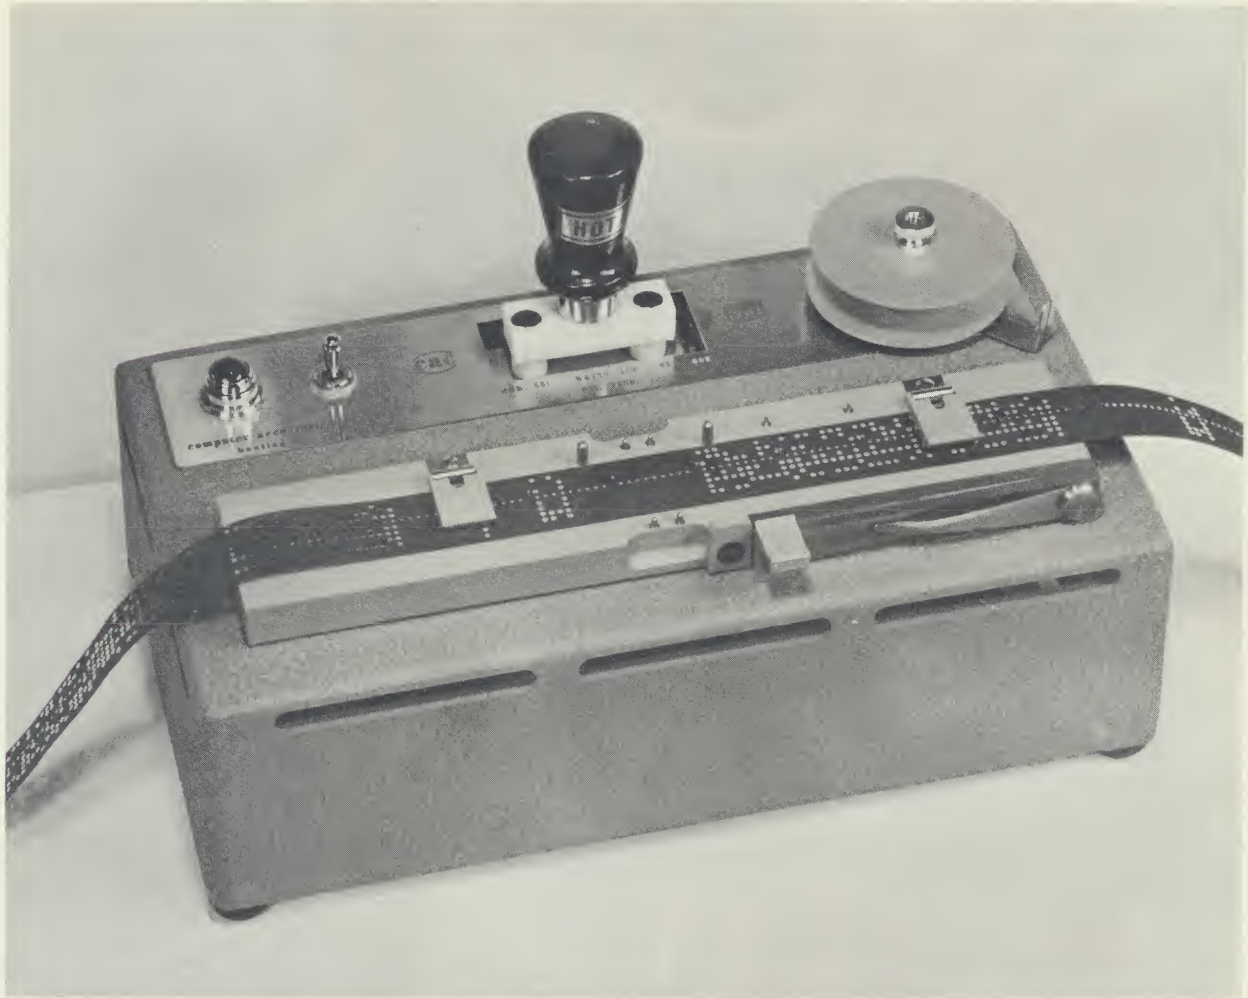

\$79.50 with knife

\$63.50 without knife

CAC SPLICER

MOD 501-AF FOR 6 CHANNEL ADVANCED FEED — MOD 501-LV: OLIVETTI TAPE SPLICER
MOD 501-P PAPER ONLY 501-M MYLAR ONLY 501-PM BOTH PAPER AND MYLAR

Designed for paper "Model P," mylar "Model M," perforated tapes. "Model MP" allows for the intermixing of these tapes. Edge punched cards "Model EP" and magnetic tape splicer "Model MG" complete the line of stock splicers.

Uses a prepunched 1.5 mil thermoplastic coated mylar tape for the splice. .05 mil splicing mylar available for magnetic tape.

Any level punched tape, chad or chadless, quickly, safely, and permanently spliced without loss of code.

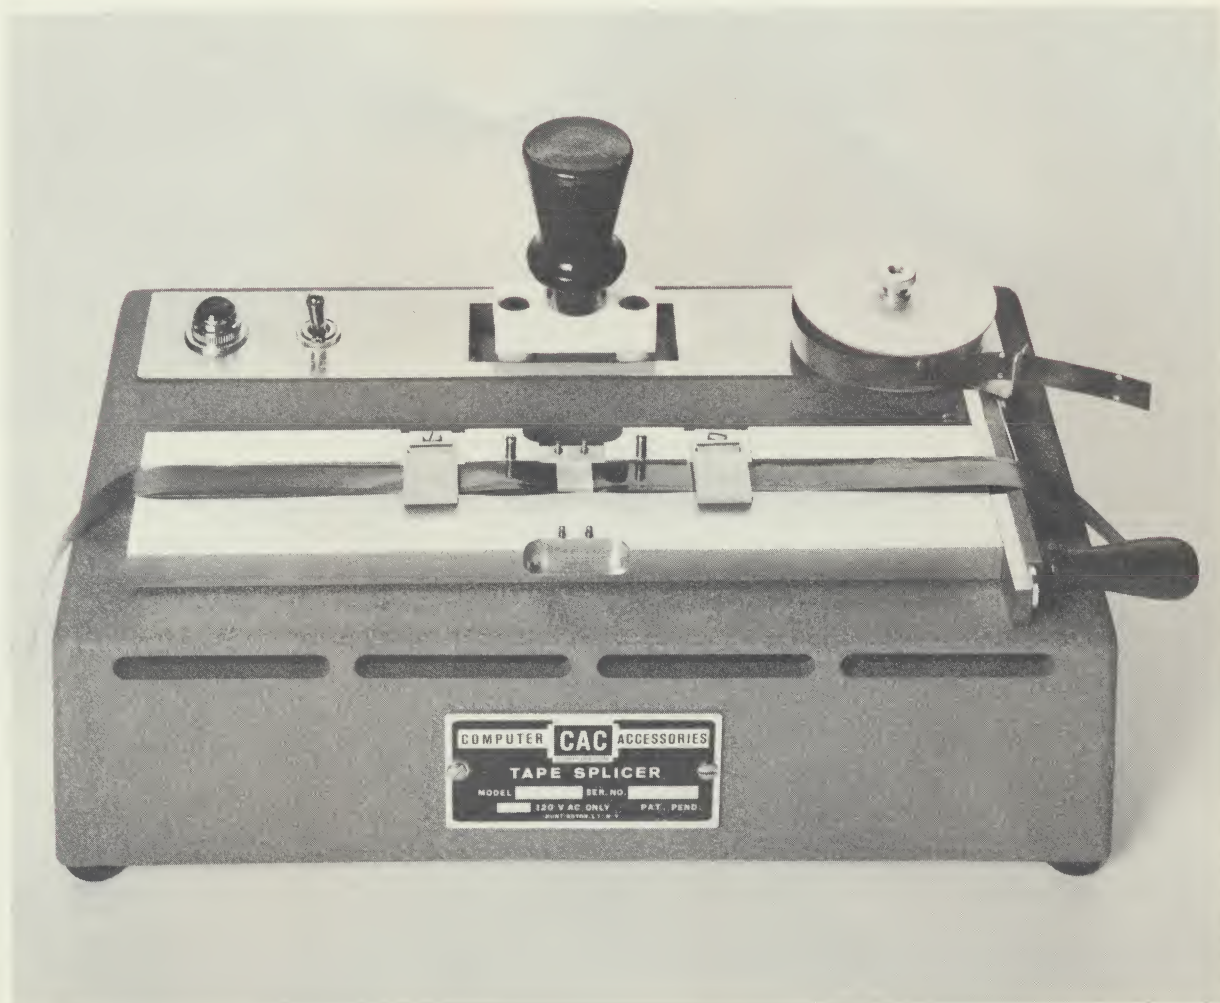

A non-perforated (XF) splicing material is used for editing.

No special training required--used by any number of office personnel.
